Our HQ

Visitors are always welcome to view our facilities in Burgess Hill. We have packed a lot in our 3000 square feet unit since we moved from Hove in 2005. We have manufacturing and repair facilities plus sales office and trade counter for purchases of essential consumable and accessories. We carry good stocks of wired and wireless microphones as well as blank media and batteries

Summer 2016

A selection of projects delivered so far this year

European football championships 2016

New projectors and a large format video screen have been upgraded for long established St. Francis Social & Sports Club in Haywards Heath. The kit was required at short notice to replace ageing equipment that proved not fit for purpose. They can now enjoy the Euro's in HD!

Servicing Interactive White Boards (IWB)

We continue to support new and old installations of Interactive White Boards. There are many IWB still in use requiring servicing and repair. We regularly attend to these whilst suggesting replacement with modern touch screens

RODE goes Underground

We are delighted to continue supporting the Underground Theatre in Eastbourne by donating a Rode NT1A large diaphragm condenser microphone. Chris Leach, Technical Manager at the Underground is shown receiving the microphone from TSPro's Keith Upton

Bognor Rugby 7's Festival

In May this year we supported this major rugby event held in Bognor Regis. Live announcements and music was required over two areas separated by a major road. So two sites required the same programme – one site with no mains power. Using an EV line array on one site the audio was linked to a generator powered HK Audio Projector system on the second site using a Sennheiser UHF radio link. It worked perfectly during the whole event day. By planning well ahead we efficiently assembled the equipment on site to a very tight time scale and were able to meet the client's early start time.

ZXA1

FLX

Mini Defender

QuPac

QuPac ZxA1 FLX

Sounding like some complex code the combination of letters and numbers mean a lot to us and to our techy customers. The Allen & Heath QuPac is now part of our hire stock and gives powerful mixing from an extremely small package. But the biggest feature from our point of view is the multi-channel recording facility of the 32 tracks.

We have added some Electrovoice ZxA1 compact powered loudspeakers, useful for small PA's, infill and low visibility stage monitors. It's a full sound from an 8" driver. The ZxA1's join their passive waterproof brothers already on our hire stock.

We have also added a Zero88 FLX digital lighting desk, an easy to use compact desk with touch screen, it's ideal for first time digital hire users. Finally another useful addition to our hire stock are the Adam Hall 3 compartment Mini Defender series cable covers. Ideal for outside events to safely run cables

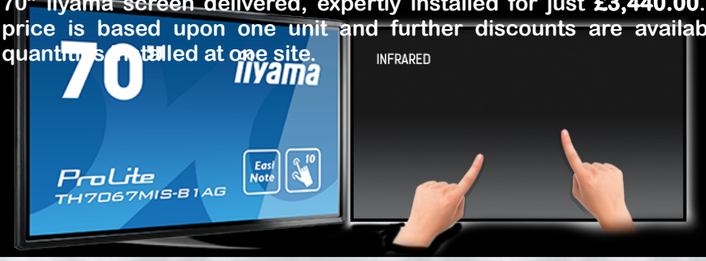

Sennheiser wireless 2000 series

Touch Screens – special offer for Educational Users

We have installed new iiyama touch screens at several educational establishments. These are powerful teaching aids and we are offering a 70" iiyama screen delivered, expertly installed for just **£3,440.00**. This price is based upon one unit and further discounts are available for quantities installed at one site.

Do you have a Project?

If you have a project with Audio Visual, Sound, Stage Lighting, Drapes & Curtains then call us for a FREE site survey and quotation. We offer a prompt efficient service using knowledgeable staff and are able to specify equipment for any budget.

Tango and Live Music

During our busy May. Brighton Goes Gospel (BGG) held their first concert in 2016, "Feeling Good" at Roedean School's Theatre. As usual it received our full attention with five technicians setting up and operating all the sound and lighting. 37 radio mics, 12 condenser hanging mics, our Allen & Heath GLD80 and the new QuPac digital mixers, both maxed out with over 75 channels used! Later we supported the International Tango Festival at Ardingly College with a variety of sound systems and a technician for the two live bands, Orquesta Silbando from Paris and Otros Aires from Buenos Aires.

TSProfessional SOUND + LIGHT

You can purchase a wide variety of competitive priced products from our On-Line Store **www.tsprosoundandlight.co.uk**, if you do not wish to purchase on line then telephone us and we will deal with you direct. If you are an education establishment your goods will be supplied on a credit account.

Pro CONN ©
British Made Quality Cables

CABLES GUARANTEED FOR LIFE!

Our own brand ProCONN cables are now being supplied to many customers and feature as part of any installations carried out by TSPro. Each cable supplied is guaranteed for life. Wherever possible these leads will be manufactured using Neutrik connectors and the best European cable and currently we are changing over to Klotz cable. Each cable is supplied with a clear piece of heat shrink ready for customers to attach their own identification label. See **www.proconn-cables.co.uk**

Saltdean Primary School

Brighton & Hove City Council commissioned us to upgrade the old sound system at Saltdean Primary School's main Hall. The Hall has been extended and we have put in place a good sound system based upon Proel loudspeakers and featuring a QSC TouchMix-8 digital audio mixer for simple operation. The TouchMix-8 is proving very popular on small installations, giving powerful speaker and channel processing yet easy control.

We also have just completed servicing and upgrading the old analogue stage lighting system to a new digital system with DMX control and some new powerful LED lighting fixtures.

LED RGB fixture

QSC TouchMix-8

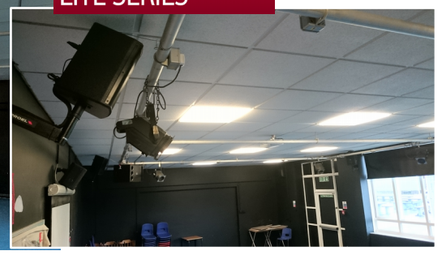

Chailey School

The same small format digital mixer from QSC, the TouchMix-8 was the ideal solution for the Drama Room at Chailey School. This time, the easy recall of scenes for the speaker processing and routing highlighted the TouchMix. The room was fitted with 4 new Proel active speakers and an active Sub-woofer. The room layout changes from "portrait", for theatre productions, to "landscape", for video viewing, assemblies and courses, at the touch of a button. Basic surround capabilities are possible for the future use of the School's Drama Department.

PROEL
LITE SERIES

Exhibition Support

We have supported various local exhibitions organised by Mid Sussex District Council, Sussex Pages and Burgess Hill Business Park Association. We supply the power distribution for the individual stands and a large sound system for efficient paging announcements and ambient live music.

HK Audio launch the new NANO 680i
powerful and flexible sound system

We have sold many of the original NANO 300 systems and then came along the more powerful NANO 600.

Now HK Audio's LUCAS NANO 608i is the first all-in-one PA to feature an onboard iPad-enabled mixer. With eight channels, impressive reverb programs, intuitive EQ and compressor functions, and convenient Bluetooth streaming, this new top-liner among end-to-end systems makes professional wireless mixing easier than ever. Remarkably compact and ultra-light at just 16.3kg, this handy PA also delivers the extraordinary audio power you would expect from the LUCAS NANO 600.

You can purchase any of the HK Audio products from our on-line store www.tsprosoundandlight.co.uk or by telephone.

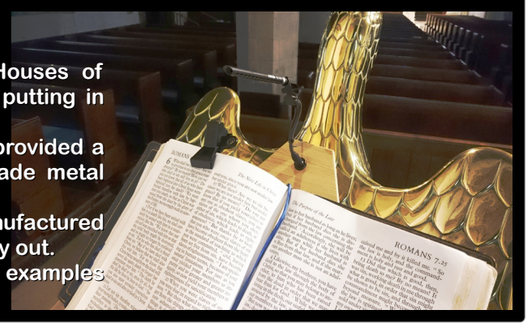

Bernhard Baron Cottages

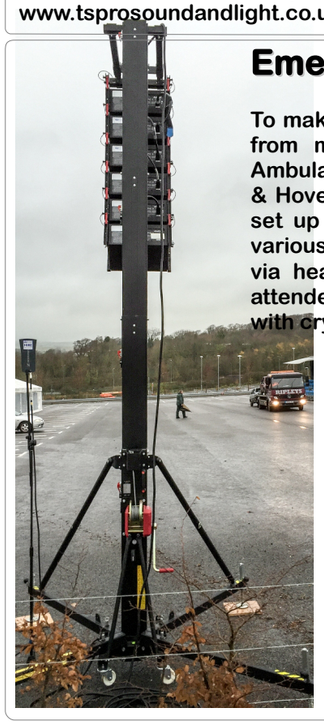

We recently upgraded the audio system with a new Yamaha digital control system for easy operation, also wireless. Now any member of staff can easily operate the radio microphones and music/TV/DVD sources of two flexible areas. Increased audio quality from the powerfull Yamaha DSP with only one thing for the residents to do: enjoy!

Working with the Worship Community

We carry out many permanent Audio Visual installations in Houses of Worship. Frequently we have to minimise the visual impact of putting in loudspeakers, monitor screens and other pieces of equipment.
At St. Mary's in Eastbourne we as usual achieved this and also provided a discrete mounting of a lectern microphone using a custom made metal bracket.
We have excellent facilities to produce custom designed and manufactured brackets and boxes etc. for any of the installation projects we carry out.
For other examples of our comprehensive work you can see more examples on the Installation Section of our recently updated website.

Emergency Services Education Day

To make young people aware of the circumstances arising from motor vehicle accidents Sussex Police, Fire and Ambulance Services used the main car park at the Brighton & Hove AMEX stadium for a simulated demonstration. We set up a small line array system, generator powered for various incident officers to commentate on the proceedings via head worn radio microphones. About 500 students attended this event seeing the event unfolding before them with crystal clear commentary.
